Comparative Survey Design and Implementation International Works

Typ wydarzenia: Warsztaty

Miejscowość: Warszawa

Organizatorzy: Instytut Filozofii i Socjologii Polskiej Akademii Nauk PAN

Instytut Filozofii i Socjologii PAN zaprasza na coroczne warsztaty organizowane wspólnie przez CSDI, IFiS PAN i Ohio State University. Warsztaty są miejscem spotkań naukowców zajmujących się badaniami porównawczymi.

CSDI (csdiworkshop.org) cieszy się uznaniem w zakresie planowania i realizacji badań wielokulturowych. Tegoroczne warsztaty będą szczególnie poświęcone harmonizacji danych.

CSDI enjoys high scientific recognition in the field of comparative survey methodology, as they provide guidelines and best practices for all elements that form the lifecycle of multicultural surveys (ccsg.isr.umich.edu). CSDI annual workshops constitute a forum and platform of collaboration for scholars involved in research relevant for comparative survey methods.

At the 2019 CSDI International Workshop, members of the SDR Project of OSU and IFiS PAN are organizing the session Harmonizing Panel Survey Data for Multi-Cultural Research. By repeatedly collecting information from the same individuals, panel surveys are best suited for analyzing the conditions, causes and consequences of change that people experience over time. Yet, because they are costly to field, such data are underrepresented among survey studies; international panels are especially rare. A solution that can facilitate cross-national research using panel data collected in different countries and time periods is the harmonization of these data. For single-country panel studies with well-defined research agendas, researchers can identify theoretically relevant variables and harmonize them ex-post. For ongoing panels, researchers can harmonize ex-ante selected variables that pertain to specific research topic(s), so that subsequent rounds of each single-country study will contain the needed data for comparative analyses.

Researchers can harmonize prior waves of the panel survey ex-post and prepare them for ex-ante harmonization. However, as one needs to consider both between-

and within-panel harmonization, this strategy poses significant yet surmountable methodological challenges. This session invites theoretical and empirical contributions to methods that are designed to evaluate and improve the comparability of extant panel survey datasets, as well as strategies for harmonization and the analysis of data from different panel studies.

Speakers: Adam Rybak, Institute of Sociology, University of Adam Mickiewicz, Poznan; Alisu Schoua-Glusberg, Research Support Services; Amaru Cuba Gyllensten, Research Institutes of Sweden; Aneta Guenova, US Department of State; Anna Kiersztyn, University of Warsaw, Benjamin Beuster, NSD - Norwegian Centre for Research Data, Brita Dorer, GESIS-Leibniz-Institute for the Social Sciences, Carsten Broich, Sample Solutions BV, Clara Becker, University of Cologne, Danuta Przepiórkowska, University of Warsaw, Evelyn Brislinger, GESIS-Leibniz-Institute for the Social Sciences, Francesco Sarracino, STATEC, Geneviève Michaud, Sciences Po Paris, Gianmaria Bottoni, European Social Survey HQ, City, University of London, Hilde Orten, NSD - Norwegian Centre for Research Data, Ireneusz Sadowski, Institute of Political Studies of the Polish Academy of Sciences, Irina Tomescu-Dubrow, Institute of Philosophy and Sociology, Polish Academy of Sciences, Jonas Andersson Schwarz, Södertörn University, Jose-Luis Padilla Garcia, University of Granada, Julie de Jong and Kristen Cibelli Hibben, University of Michigan, Lars Lyberg, Inizio, Magnus Sahlgren, Research Institutes of Sweden, Marek Muszyński, Institute of Sociology, Jagiellonian University, Marta Kołczyńska, Institute of Philosophy and Sociology, Polish Academy of Sciences, Mousumi Sarkar, Well World Solutions, LLC, P. Linh Nguyen, University of Essex; University of Mannheim, Patricia Goerman, U.S. Census Bureau, Patricia Hadler, GESIS-Leibniz Institute for the Social Sciences, Peter Mohler, Mannheim University, Ramiro Flores Cruz, Sistemas Integrales, Sarah Butt, City, University of London, Shulin Jiang, PMA2020, Johns Hopkins Bloomberg School of Public Health, Sofia Axelsson, University of Gothenburg, Stefan Dahlberg, University of Gothenburg, Sunghee Lee, University of Michigan, Timothy P. Johnson, University of Illinois at Chicago, Tom W. Smith, NORC at the University of Chicago, Yu-chieh (Jay) Lin, University of Michigan, Zbigniew Sawiński, Institute of Political Studies of the Polish Academy of Sciences, Zeina Mneimneh, University of Michigan.

Adres: pin Instytut Filozofii i Socjologii Polskiej Akademii Nauk Nowy Świat 72,
