ethnolinguistics, indigenous studies**

Instytucja: Uniwersytet Warszawski

Miejscowość: Warszawa

Dziedziny: językoznawstwo

Language as a cure: linguistic vitality as a tool for psychological well-being, health and economic sustainability Project is carried out within the TEAM Programme of the Foundation for Polish Science

Project description:

The project addresses social, cultural and economic challenges linked to the reduction of linguistic diversity as well as discrimination and trauma linked to language endangerment and loss among speakers of minority languages and migrants. It aims at providing holistic, interdisciplinary, and contextualized study seeking relationship between language vitality and psychological and physical health and wellbeing, including economic sustainability, development and productivity. It will also provide responses on the level of application of research results at societal, educational, economic, psychological healthcare-related levels. The study will be based on carefully selected groups speaking minority and migrant languages, focusing on the area of Poland (speakers of Lemko and Wymysorys, Ukrainian migrants), but including a comparative perspective for relating to earlier research on the topic carried out in non-European contexts and necessary for testing the developed hypotheses (Nahuatl).

Institution: Faculty of „Artes Liberales”, University of Warsaw

Project leader: Justyna Olko. Co-director: Michał Bilewicz
